

Mine Super offers a range of investment options to help you meet your financial goals.

Find the right investment for you

Before deciding which investment options are appropriate for you, it's important to be familiar with basic investment concepts and work out your savings goal, risk tolerance and investment time frame.

You can find out more about investments on our website at mine.com.au/investment-options

If you'd prefer personal financial advice, Mine Super Financial Advice can provide advice about making an investment choice. Call us on 13 64 63 to book an appointment.

Mine Super's investment options

You can choose to invest in any of the pre-mixed investment options, which are diversified across various asset classes to match different investor risk profiles, as well as a number of asset class investment options, which allow you to determine your own asset allocation.

How do I make an investment choice?

You can make an investment choice at any time for free by going to mine.com.au and either:

- logging in to your online account using your member number and password. From the main menu, select **Manage my investments**, then **Change my investment options**.
- completing and returning a **Make an investment choice** form.

Your choice will be effective the next business day after we receive your investment switch request. We might take longer to process your switch or suspend switching if necessary.

Remember, super is a long term investment. However, if your circumstances change, you can switch your investments at any time. Having this flexibility will help to ensure you're on track for your retirement goals.

Keeping track of your investments

We send you a member statement once a year showing how your investments are performing. To check your investment choice and account balance at any time, log in to your online account with your member number and password at mine.com.au/login

What if I don't want to make a choice

You can remain confident we're looking after your money.

If you don't make an investment choice we automatically invest your super in our Lifecycle Investment Strategy. Our Lifecycle Investment Strategy works by giving you greater exposure to growth assets such as shares in the early stages of your working life, and then reducing this as you get older by increasing your exposure to defensive assets such as fixed income and enhanced cash.

This exposes you to greater risk and potentially higher returns when you're young and then aims to reduce volatile investment returns as you get older.

Our Lifecycle Investment Strategy invests your super over three lifestages, with members invested 100% in the investment option relevant to their age - members under age 50 are invested in High Growth, those aged 50-54 in Growth, and those age 55 and above in Balanced.

International Shares

The return from the International Shares investment option is affected by movements in the value of international currencies. This is also known as being 'unhedged'. A rise in value of the Australian dollar will have a negative impact on performance, while a fall in value will have a positive impact on performance.

Property

A portion of the international investments in the Property investment option are hedged. Currency hedging, which involves selling the international currency and buying the Australian dollar, reduces the currency volatility of this option's international investments.

Mine Super's investment options

We offer a range investment options for you to invest your super:
